

SG1006

WALK THROUGH METAL DETECTOR

■ FEATURES

The SG1006 single zone walk-through metal detector of remote control, features by market's most famous design, is light-weighted during transportation and offers simple operation for all users. It can accurately analyze weapons and other suspicious materials and give alarms from the bottom to the head.

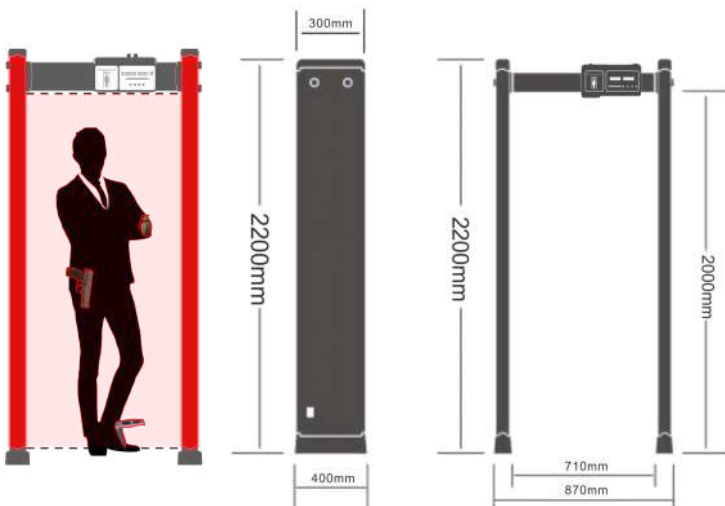

- Accurate Alarm in all areas.
- Unique Anti-Interference Performance
- Full-Module Design for Easy and Rapid Assembly
- Bi-Directional Detection and Counter
- Password Protection operated by authorized person only
- High Discrimination and Throughput
- No harm to human body with heart pacemaker, pregnant women, etc.

■ TECHNICAL PARAMETERS

Sensitivity Level: 200 grades(adjustable)
Power consumption: <20 W
Vertical Channel Size: 2000 x 710 mm
Vertical Dimension: 2200(H) x 870(W) x 400(D)mm
Working Frequency Range: 1~50 bands
Working Voltage: AC100-240, 50~60 Hz
Working Environment Temperature: -20°C~+45°C
Pass through rate: Over 60 people per minute

■ Single Zone

■ PACKAGE

N.W/G.W: 30G/40KG

Carton Box Dimension Size: 2300*330*450mm

■ Accurate Detection

- Can detect a wide variety of threatening metal objects, including even a small coin, when someone passes by
- No LED Light Bar on both side of panels.

■ Superior Reliable Design & Installation

- Completely Modular for quick installation.
- Overhead control unit with LED display, minimalist function keys and interface signal indicator.
- The overall system is characterized by robust, reliable electronic and mechanical construction.

■ Interface Suppression

- 50 adjustable working frequency to eliminate the potential effects from x-ray device, radio and other electrical interface sources.

■ Acoustic Alarm Signaling System

- Audible alarm when a target has been detected.
- Provide ability to randomly alarm on a selected range of tones intensity levels. The wide volume control dynamic allows operation even in very noisy environment.

■ OPTIONAL FUNCTIONS

Removable Wheels

Removable wheels for easier portability. It is applicable to all detectors in today's market.
Loadbearing: 150kg
Part#: SG-WT001

Crossbar Battery Back-up

Crossbar battery back-up in stainless steel case. Support 6h, 12h, 24h of autonomous working time.
Part#: SG-WT002

Metal Detector Divesting Slope Table

To collect and manage the personal metal belongings (phone, key, etc.) when in transit, so that it can avoid false alarm.
Part#: SG-WT004

Integrated Turnstile for Access Control

The turnstile can be integrated into the detector. When the detector alarms, the turnstile closes and prevents entry.

Dual Ports on Both Side Panel

Customize ports (exits, turnstiles) on other size tunnels, user friendly.
(Standard only opens one side)
Part number: SG-WT006
